

CitBackup backup script for Citadel groupware (1.0)

Creates a hot backup of your Citadel groupware installation. Run this daily or your logs could get huge.

Official support sites: [Official Github Repo](#) - [Official Forum](#)

Make sure you have the "Settings->Automatically delete committed database logs" option disabled!

- i. Edit the settings at the top of citbackup.pl if needed
- ii. create a cron job like this:
1 1 * * * /root/citbackup/citbackup.pl
- iii. This will back up your citadel installation at 1:01am each day, and keep the last 5 backups.
